1. The declaration (received 3/20/2008) crossed in the mail with the office action mailed 3/25/2008. Therefore a new mailing by the PTO is warranted.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Philip A. DuBois (50696) on May 16, 2008.

The application has been amended as follows:

Please cancel claims 1 and 4.

In claim 5, at line 2, please delete "a substrate and"

In claim 5, at line 3, please replace "claim 4" with - - claim 6- -.

In claim 6, at line 1, please insert after "comprising" - - a substrate and - -

In claim 6, at line 11 (after the formula of compound 25, but before the period), please insert - - and wherein the cyanine dye has a decomposition temperature of less than 247.9 ° C - -

In the specification please replace the abstract with that below.

3. The following is an examiner's statement of reasons for allowance: The declaration (received 3/20/2008) crossed in the mail with the office action mailed 3/25/2008. This declaration in combination with the data in table 1 of the specification evidences that the cyanine dye of Hamada et al. example 2 has a significantly higher decomposition temperature than the inventive dyes 10,12 and 19. As the mode of writing is by decomposition/bleaching of the dye, the lower decomposition temperatures of the inventive cyanine dyes when used in optical

Art Unit: 1795

recording media would result in increased sensitivity. The lower decomposition temperatures of the inventive dyes are not known in the prior art, particularly in comparison to the dyes of Hamada et al. (and the other references as the dyes of the primary references are similar) and therefore the benefit ascribed to the use of the recited dyes was unknown and unobvious at the time the invention was made.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Martin J. Angebrannt whose telephone number is 571-272-1378. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
